Transmission case shifter shaft seal installer tool

No. 767 - Use to install H-D seal No. 37101-848 on 2006 to present H-D 6-Speed Cruise Drive transmissions, and Sportsters 1984 to 2005.

No. 768 - Use to install H-D seal No. 12045 on all Big Twins 1980 to 2006 using a 5-speed transmission case.

Installation:

1. Refer to H-D Service Manual for the year and model you’re servicing for instructions on getting access to, and removing the old seal.

2. After the old seal is removed clean the seal seating area and shifter shaft of any dirt, etc.

3. Lube the I. D. and O. D. of the new seal and gently slip it over the spline area of the shifter shaft and position it against the case. See Fig 1

4. Place the hole end of the tool on the shaft up against the seal and using a light mallet tap the end of the tool until the seal seats in the case.

5. On the 5-Speed case the seal will seat flush with the case using tool No. 768. See Fig 2

6. On the 6-Speed case the seal will seat inside the counter bored area using tool No. 767.

Note: Notice the shifter shaft has a larger O. D. step on it. Make sure your seal is seated in the case approximately .050” inside bore allowing the seal to sit on the larger shaft O.D. See Fig 3.

7. Install your washer and retainer ring onto the shaft per service manual.

CAUTION: Wear safety glasses over your eye’s. See JIMS® catalog for hundreds of top quality professional tools. The last tools you will ever need to buy.
