**INSTRUCTION SHEET FOR #97272-60**

**Cam Bearing Installation Tool**

Use on single Cam Big Twin 1955-Present

Refer to HD® Service Manual for specifications.

Caution: Use Torrington® cam bearing

Warning: Disconnect negative cable of battery to avoid accidental start ups.

Note: This tool JIMS tool #97272-60 must be used with JIMS tool handle #33416-80 for proper usage.

1. Remove inner cam bearing using JIMS® tool #95760-TB (see instructions with tool).
2. If the job you are doing is on 1970 and up Big Twin, install tool #33416-80 thru cam cover bushing.
3. Mount tool #97272-60 to small end of handle #33416-80 followed by a new Torrington® bearing with a press fit lube, on bearing and in bearing bore, with lettered side facing outward.
4. Install cam cover onto right case over the two dowel pins, push handle to start bearing into it's bore.
5. Make sure it starts squarely.
6. Press on end of handle until the flat face of tool #97272-60 is up against case. The cam bearing is now to .020 below the case. Use JIMS® Go and No Go plug gauges for the right fit on cam, No.2249.

---

**RACE & BEARING INSTALL TOOL HANDLE**
